

## GPS Tracking Now Available!!

Ascora now has inbuilt GPS tracking capabilities. Ascora GPS trackers can be purchased directly from Ascora or via our partners. The GPS trackers come with the necessary SIM card and the associated data plan so you don't have to understand telecommunications mumbo-jumbo or hunt around for the SIMs and plan. Data from the GPS units integrates directly into Ascora and will be displayed in the Ascora Web Portal.

**Be one of the first to get your LIVE TRACKING!**

## View Your Vehicles in Real time

Quickly and easily view the current location of all vehicles on a map in Ascora.

View the trips and daily coverage for each vehicle.

Telemetry data keeps track of your vehicles and the status of the tracking devices and batteries if applicable.

### Interactive Map

See the location of all of your vehicles in real-time on the live tracking map.

### Driving Habits

Ascora automatically logs the speed of your vehicles and any driver incidents that occur such as harsh braking or acceleration.

### Asset Tracking

Check the past trips for all vehicles, including total travel and stop times, on an interactive map.

### Route History

View past journeys for all assets overlaid on an interactive trip coverage map.

#### Champ - Hardwired GPS Tracker for Vehicles

A compact cellular 4G Cat-M1/NB-IoT tracking device with a variety of inputs and outputs, and driver-ID capability.

#### Key Features

- Compact 4G Cat-M1/NB-IoT
- Concurrent GPS and GLONASS tracking, with LNA amplified signals
- 3D accelerometer does driver behaviour monitoring including harsh braking
- Variety of inputs and outputs, including Driver ID options
- Outputs allow for remote immobilization of assets

#### Legend - Plug and Play GPS Tracker for Vehicles

A compact cellular 4G Cat-M1/NB-IoT tracking device that easily plugs into the OBD port of a vehicle for power.

#### Key Features

- Affordable and reliable
- Compact 4G Cat-M1/NB-IoT
- Concurrent GPS and GLONASS tracking, with LNA amplified signals
- 3D accelerometer does driver behaviour monitoring including harsh braking
- Easy install

#### Skye - Robust Non-Vehicle Tracking

Designed to track any non-powered asset that it can be secured to.

Common applications include:

- Vehicle, Trailer and Bin Tracking
- High Value Hire & Rental Equipment Tracking
- Shipping Containers, Freight and Caravan Tracking
- Mining and Construction Equipment Tracking
- Livestock and Agriculture Equipment Tracking
- Boats, Jetskis, Bikes and Scooter Tracking

#### Key Features

- Up to 7 years battery life
- 4G LTE Cat-M1/Nb-IoT
- High G-Force Detection and Alerts
- PTCRB Approved
